▶ How to Play

Step 1 – Make Your Opening Bid

Each team predicts how many correct answers they believe they can identify.

Example

Team	Prediction
Team A	7
Team B	5
Team C	4

The team with the **highest prediction** takes control of the first turn.

Step 2 – Take Your Turn

The team selects answers one at a time.

- ✓ Every correct answer is revealed and remains visible.
- ✓ Each correct answer counts towards the team's prediction.
- ✕ Selecting **one incorrect answer** immediately ends the turn.

Step 3 – Achieving Your Prediction

If the team successfully identifies the number of correct answers they predicted:

- They win that number of points.
- The round ends immediately.
- The facilitator reveals any remaining correct answers before starting a new round.

Example

Prediction: **7**

The team correctly identifies **7 answers**.

Result: The team scores **7 points** and wins the round.

Step 4 – Missing Your Prediction

If the team selects an incorrect answer before reaching its prediction:

- The correct answers they found remain visible.
- The team is frozen out from the next bidding round.
- Play pauses for a **new round of bidding**.
- The remaining teams take part in the new bid.
- Teams bid for the number of **remaining hidden answers** they believe they can identify.

The team making the highest new prediction takes control of play.

Example Round

There are **10 correct answers** hidden.

Opening Bids

Team	Bid
Team A	**7**
Team B	6
Team C	4

Team A plays first.

Team A

Prediction: **7**

Selections:

✓ Correct

✓ Correct

✓ Correct

✓ Correct

✓ Correct

✓ Correct

✕ Incorrect

Result

- Team A has revealed **6 correct answers**.
- Four correct answers remain hidden.
- A new bidding round begins.

Second Bidding Round

Only the remaining teams bid.

Team	New Bid
Team B	**8**
Team C	7

Although only four answers remain hidden, Team B bids **8** because six correct answers have already been revealed. Team B only needs to find **two additional correct answer** to reach a total of **8**.

Team B plays next.

✓ Correct

✓ Correct

Result

- Team B has now reached a total of **8 correct answers**.
- Team B scores **8 points**.
- The facilitator reveals the remaining answers.
- The round ends.

🏆 Winning the Game

The winning team is the team that scores the **highest number of points** by successfully achieving its prediction.

Higher bids allow teams to score more points but carry greater risk, as selecting a single incorrect answer immediately ends their turn and opens the bidding to the remaining teams.

💡 Facilitator Notes

- Teams may only score by successfully achieving the prediction they have made.
- If a team misses its prediction, play does **not** continue automatically. Instead, a new bidding round takes place between the remaining teams.
- Previously revealed correct answers remain visible throughout the round.
- Once a team successfully reaches its predicted total, the round ends and the facilitator reveals any remaining correct answers before starting a new game.
